Words that are written in **bold** are when the leader is speaking. Feel free to use your own words.

A. **Reading the Bible is something we do all our lives. It is different from any other book because it is alive and it is filled with God's truth.** Invite a volunteer to read Hebrews 4:12. **You can read a Bible story 10 times and the 11<sup>th</sup> time you can still learn something new. Today we are going to do a lesson that will help us understand the geography of the Bible. Through the years, as we read the Bible, this activity will help us learn where the stories took place and how they relate to other stories.**

B. **ACTIVITY #1:** The larger the space the more memorable the activity. If possible, find a large open space and use large pieces cut from a blue tarp to represent Middle East water landmarks.

Home improvement stores sell blue tarps as large as 20' by 30'. It costs more but remember you can use this activity multiple times. The map will not be to scale but will show the relative locations between key landmarks.

Tape a sign with a large "N" to represent "north" on one wall. Randomly lay out the labeled pieces of blue tarp. See if family members can put the landmarks in the correct locations. After giving them a turn, use the map included with this activity to place the landmarks into the correct locations.

**The map we created is not exactly drawn to scale but it shows the relationship of key Biblical landmarks.**
